Functional Equations and Inequalities with Applications presents a comprehensive, nearly encyclopedic, study of the classical topic of functional equations. Nowadays, the field of functional equations is an ever-growing branch of mathematics with far-reaching applications; it is increasingly used to investigate problems in mathematical analysis, combinatorics, biology, information theory. Download Difference equations and inequalities by Ravi P ... Based on some known results and simple technique, we emphasize in this article, certain nonlinear dynamic integral inequalities in one variable on timescales. Part of the novelty herein not only unifies and extends some integral inequalities related to different cases of positive constants but also explores the explicit bounds for discontinuous functions on timescales. Computational approach of dynamic integral inequalities ... Ravi P. Ph.D., Indian Institute of Technology, Madras (India) Research Interests: Nonlinear Analysis; Differential and Difference Equations; Fixed Point Theory Ravi P. Agarwal | Texas A&M University Kingsville Finite difference inequalities in one or two independent variables which provide explicit bounds play a fundamental role in the study of boundedness, uniqueness, and continuous dependence on initial data of solutions of difference equations. Many difference inequalities have been established (for example, see [1–11] and the references therein). In the research of difference inequalities, generalization of known inequalities has been paid much attention by many authors. Some new finite difference inequalities arising in the ... Abstract. This paper concerns the existence of solutions for the Dirichlet boundary value problems of -Laplacian difference equations containing both

advance and retardation depending on a parameter . Under some suitable assumptions, infinitely many solutions are obtained when lies in a given open interval. The approach is based on the critical point theory.
