Exploratory Multivariate Analysis by Example Using R ... 2 Exploratory Multivariate Analysis by Example Using R datasets (decathlon, European city temperatures, chicken genetic expression) which, chosen to be well-suited to PCA, yield illuminating graphics. In the analyses of these, very effective use is made of supplementary elements to highlight features of the data, and all results are Exploratory Multivariate

Analysis by Example Using R Multivariate Analysis  
Multivariate data involves three or more variables. For example, when a web developer wants to examine the click and conversion rates of four different web pages among men and women, the relationship between the variables can be measured through multivariate variables. Univariate, Bivariate and Multivariate Data Analysis ... Exploratory multivariate analysis by example using R (PDF) Exploratory multivariate analysis by example using R ... The purpose of "Exploratory Multivariate Analysis by Example using R" is to provide the practitioner with a sound understanding of, and the tools to apply, an array of multivariate technique (including Principal Components, Correspondence Analysis, and Clustering). The focus is on descriptive techniques, whose purpose is to explore the data from different perspectives, trying to find patterns, but without going into the realm of inferential statistics, with its formal tests of hypotheses ...
